Abstract (en)

[origin: WO2008041920A1] The invention relates to a method and an arrangement for extracting carbon dioxide from air. According to the invention, carbonic anhydrase is placed on a rotor blade 5, for example the rotor blade of a wind power plant 6. Carbon dioxide is absorbed on the 5 rotor blade and transported away from the rotor blade. The carbon dioxide so extracted may optionally be used to manufacture methanol.
