Abstract (en)
[origin: US2010083854A1] A method for starting up a web-fed printing machine, in which a web to be printed on is guided through at least one printing gap formed by a printing cylinder and a counter printing cylinder of the web-fed printing machine; the printing cylinder accelerates to a print-on speed (N_{print-on}) in a position retracted from the web and is applied to the web; and at least during a partial phase of the acceleration of the printing cylinder, the web is stationary or is conveyed at an initial speed (N_{in}) which is lower than the current speed of the printing cylinder.
