Abstract (en)
[origin: EP1900633A1] A mount for supporting part of a marine drive system to a marine hull, the mount comprising: a rigid outer housing (837) defining a radially outer circumferential surface on its radially inner surface; a resilient mounting (831) disposed radially within the outer housing (837) and defining a radially inner circumferential surface, the marine drive system passing through and supported by the resilient mounting (831) in use; wherein a circumferential radial gap is provided either between the resilient mounting and the rigid outer housing or within the resilient mounting.
