Abstract (en)

[origin: WO2008110864A2] The invention provides an apparatus (10) for packaging a pasty food product such as processed cheese, stock cubes, butter, margarine and the like, by wrapping each product in a respective wrapper. The apparatus comprises a mounting frame (12), means (14) for feeding the packages being formed and application means (16) for applying the cover sheets on the packages and which in turn comprise means (18) for mounting a respective roll of material (19). The means (18) for mounting the roll of material (19) are located on the side of the feed means (14) opposite the mounting frame (12) so as to maximize accessibility and facilitate the work of personnel in charge.
