Abstract (en)

[origin: WO2008031645A1] The present invention relates to a safety device (100) for a gas-cooking appliance (101) comprising sensor means (5) for detecting the presence of at least a piece of cookware on at least burner (3) of said cooking appliance. The gas cooking appliance comprises also a control unit (70) that receives from said sensor means at least a detection signal (201) that is indicative of the presence of said piece of cookware. The control unit controls the operation of gas regulating means (4) for enabling/disabling the gas flow in said gas-cooking appliance.
