Abstract (en)
[origin: WO2008037094A1] The invention describes a system for transmitting product information for a product. The system contains a product with an electronic controller for capturing and/or storing product information, where the product information comprises standard information about the product and current product information, a barcode production component for producing a barcode for presenting the product information, the barcode production means being connected to the product for data transfer or being integrated in the product, and a barcode update device for updating the barcode on the basis of the standard information about the product and current product information. There is also a capture module for information capture for the product information from the barcode using an image recorder.
