Abstract (en)
The present invention discloses a convertible bag, which comprises a main body forming a garment in a stretched-out state and a first accessory provided suitably on the main body; in which the first accessory is engaged upon converting the garment to the main body, to securely hide part of the garment into another part of the garment. The convertible bag may be a satchel, a shoulder bag, a handbag, or a backpack and may further comprise a bag cover, a strap and an inner bag. The first accessory may be a zipper, a buckle, a button, a velcro, or a snap fastener. The garment may be a jacket, a vest, a shirt, a T-shirt, a sweater, a skirt or a pair of pants. Before conversion, the present convertible bag could store many items just like common bags, thus, it serves the purpose of storing and carrying items as common bags. Through simple converting operation, the convertible bag could be converted to a garment, and the converted garment is beautiful and comfortable. The garment could also be converted back to a bag whenever is needed. The present invention is simple, convenient, multi-functional, beautiful and comfortable.
