Abstract (en)

[origin: EP2070595A1] The device has a three dimensional reduction unit (3) formed of a driving motor (300), and an introduction ramp (1) equipped with a compression unit (2). A chassis (4) supports an assembly of the device, and a protection cover covers the assembly. The encumbrance of the reduction unit is small with respect to a section of the introduction ramp. The ramp and/or the reduction unit are displaced with respect to each other by a driving unit.
