Abstract (en)

[origin: EP2070655A2] The device has a positioning device part (5) comprising a holding device installation side (3), and another positioning device part (6) comprising a workpiece installation side (4). The two positioning device parts are arranged in two different operating positions, and the holding device installation side and the workpiece installation side are arranged relative to each other in different angles. The two positioning device parts are mounted or fastened to a separation plane (9) in the operating positions. The separation plane is curved along a ring segment.
