Abstract (en)

[origin: EP2071065A1] The frame (1) has assembling units for assembling a crossbar (5) with a post (3), a connection case (7) and a blocking screw (8) that blocks the post relative to the connection case. A U-shaped section body (71) of the case is fixed around an end (53) of the crossbar with a U-shaped base wall (73) placed against a terminal face of the end and with walls (72, 74) forming U-shaped branches placed against upper and lower walls (52, 54) of the end. The post is immobilized by the blocking screw in a support against the base wall of the body.
