Abstract (en)
The nozzle (1) has a suction channel provided at a housing (2) on a side that is turned to a floor, where the housing is adjustable in length in a direction perpendicular to a movement direction. The housing is designed as a multipart, and a suction connection (8) for connection with a vacuum cleaner is provided in a middle area. End sections (4, 5) are provided at a central section (3), where the end sections are adjustable at opposite sides adjacent to the suction connection. The adjustable end sections are fixable by a locking or retaining unit.

Abstract (de)
Eine Staubsaugerdüse (1) umfasst ein Gehäuse (2), an dem auf der zum Boden gewandten Seite mindestens ein Saugkanal vorgesehen ist, wobei das Gehäuse (2) in einer Richtung senkrecht zur Bewegungsrichtung (7) in der Länge verstellbar ist. Dadurch kann die Staubsaugerdüse (1) an den jeweiligen Einsatzzweck optimal angepasst werden.
