Abstract (en)
The airbag device can be accommodated in a small space and receives a pedestrian or the like properly and softly by being inflated in a stable state. The airbag device 10 includes an airbag 20, an inflator 15 blowing gas into the airbag 20, a detection means for detecting a collision, a control means for causing the inflator 15 to be activated in accordance with a signal from the detection means and a cover 11 for accommodating the airbag 20. The airbag 20 is disposed along a front pillar 2 and is to be inflated at the outside of a vehicle 1. Furthermore, a surface fastening means 30 for holding the cover 11 to the front pillar 2 is provided.
