Abstract (en)

[origin: EP2072452A1] Device (1) for supporting a component (16) of a vehicle (21), comprising: a load-bearing structure (1) provided with an opening (3) elongated in a predetermined direction (22); a pantograph lift (2) connected to said load-bearing structure (1a) and able to be positioned under said component (16) to support it; a first pin (4) able to be hitched to the vehicle (21) and passing through said opening (3) in such a way that, with the device (1) in an installation configuration, said first pin (4) is free to slide inside the opening (3) and, with the device (1) in an operative configuration, said first pin (4) is fastened within the opening (3) by a nut (12a); a stabiliser assembly (20) pivotally hinged on the load-bearing structure (1a) to provide stability to the device (1) in the operative configuration.
