Abstract (en)

[origin: EP2072683A1] The device (1) has a handling platform (3) with cable carriages (4, 5) arranged at an oblique cable (2). A stabilization cable carriage (10) is connected with the handling platform and arranged with another oblique cable (11). The handling platform is moved along the oblique cable (2) using a hauling cable (6), which is moved from the handling platform to a connection region of the oblique cable (2) with a pylon (9) that is arranged parallel to the oblique cable. A fixed roller (7) is arranged with the pylon in the connection region of the oblique cable (2).
