Abstract (en)  
System for the construction of one- or multi-story wood buildings using panels (1, 2, 3 and 4) comprising coplanar vertical deals (5), abut by their vertical edges and coupled by tension bars (8) inserted through borings (7) of the deals (5) between their vertical edges. The horizontal union of the laterally abut panels (1-2 and 3-4) is achieved through tension bars (8). The vertical union between overlapping coplanar panels and between these panels and the roofing and foundation structure is carried out by union elements which are concealed in the panels and which include female profiles (14-14'), intermediate male profiles (15) and end male profiles (16).
