Abstract (en)
[origin: EP2073314A1] The arrangement has a conductor (5) and a plug pin (8) defined for the conductor, with which the conductor is connected in a working position, for connecting another conductor (4) at a common potential. The former conductor and the plug pin have a larger electrical conducting cross section in comparison to the latter conductor and other plug pins (9,10,11,12,13). A one-piece conducting path is attached on the board (6) for connecting all plug pins that are provided with the larger cross section, on a common potential, including the connected conductor.
