Abstract (en)

[origin: WO2008034692A1] The invention relates to a water-conducting domestic appliance, in particular a domestic dishwasher, comprising a detergent dosing system (10) with at least one detergent dispenser (11) for receiving at least one cartridge (50). Said cartridge (50) has separate chambers (51a,..., 51e) for holding at least two detergents. The invention is characterised in that the amount of detergent held in each chamber (51a,..., 51e) is greater than the amount required for a washing cycle.
