Abstract (en)

[origin: US2010012161A1] A cartridge for use in a detergent-dosing system of a water-conducting domestic appliance, in particular, a cartridge for use in a domestic dishwasher of the type having a detergent dispenser configured with a holding space for holding the cartridge, the cartridge including at least a pair of chambers, each chamber for holding a detergent separate from any detergent held by another chamber; and a pair of seals, each seal being associated with a respective one of the chambers for substantially precluding discharge of a detergent retained by the respective chamber and each seal being configured to be opened at least once for a discharge of detergent from the respective chamber and to be closed again at least once.
