Abstract (en)

[origin: WO0236422A2] A bicycle training device is attachable to a conventional bicycle frame. The device is used by a non-rider to guide and control the actions of the bicycle. A clamping member is releasably attachable to the bicycle frame. A release mechanism is attached to an opposite end of the clamping member. Operation of the release mechanism engages or disengages a clasp on the clamping member to disengage the clamping member from the bicycle frame.

[origin: WO0236422A2] A bicycle training device (10) is attachable to a conventional bicycle frame. The device (10) is used by a non-rider to guide and control the actions of the bicycle. A clamping member (24) is releasably attachable to the bicycle frame. A release mechanism is attached to an opposite end of the clamping member (24). Operation of the release mechanism engages or disengages a clasp (34) on the clamping member (24) to disengage the clamping member from the bicycle frame.
