Abstract (en)
[origin: DE202006013961U1] The lifting platform has a column (1) firmly anchored on the ground and a lift slide (10) vertically movable on the column. A guide rail is fixed on the column and is aligned axially parallel to the support spindle. The rail head of the guide rail is surrounded by a guide element (20) in a sliding seat. The rail head can be partially cylindrical whilst the guide element has a circular hollow cavity broken by a longitudinal slit. The anti-friction lining of the guide element extends continuously over the entire length of same or is formed in several pieces.
