Abstract (en)
[origin: WO2008043392A1] The invention relates to a method for generating information processing systems in which informative containers and contents are created, identified, archived, modelled, communicated, modified and deleted by generating, modifying or suppressing links (1). The whole information inputted by the users and the information for describing the system takes the form of links having identical sizes and archived by a link base. The links can be provided with attributes, mainly time attributes.
