Abstract (en)

The present invention relates to a laundry treatment composition comprising an oxazoline material which is included in a polymer having at least two oxazoline-ring moieties in combination with a textile compatible carrier selected from a deterative surfactant or rinse conditioner. The invention further relates to a method of treating fabrics using the composition, and to the use of an oxazoline material having at least two oxazoline ring moieties linked by a benzene ring in the treatment of fabric which comprises oxidised cellulose to provide a colour care benefit to the fabric.
