Abstract (en)

The invention relates to an actuation transmission system for electrical equipment, joined with a moving contact (26) of a three-position switch (2), with a fixed contact (27) and a grounding contact (25), by means of a transmission bar (3). The actuation transmission system (24) comprises a compression sub-assembly (1) that comprises at least one inner elastic component (5, 6) and retaining means (7, 8, 9, 10) of said, at least one, inner elastic component (5, 6), said, at least one, inner elastic component (5, 6) and retaining means (7, 8, 9, 10) configured to join and keep the moving contact (26) and the fixed contact (27) connected, to join and keep the moving contact (26) and the grounding contact (25) connected and to guarantee the insulation between the two parts of the circuit in the isolating position of the switch (2), respectively.
