Abstract (en)

[origin: WO2007003187A1] System comprising at least one master unit (25) and a plurality of slave units (10, 16, 20, 21, 22, 23), wherein said master unit and said slave units comprise means for performing communication via radio frequency channels. The at least one master unit comprises means for transmitting control signals to said slave units, and the slave units are each provided with a unique address and are each associated with a controllable device. The at least one master unit comprises means for executing a sequential transmission of control signals to at least one of said slave units upon activation of a function control key.
