Abstract (en)

[origin: WO2007133098A1] The subject of the present invention is a method and a device for harvesting hemp grown for seeds, where seed containing hemp panicles are cut-off and stems are dew-retted or dried directly in the field. Stem sections without panicles are swathed in the field in the form of a ridge for retting or drying while stem sections with panicles are loaded on a trailer for drying and ginning to extract seeds.
