Abstract (en)

[origin: WO2008035021A2] The invention relates to a fixed carrier (1) for machine-tool parts. Said carrier comprises a table frame (3) and a table (2) comprising a first face (21) that can hold a first part (211) to be machined, the first face being fixed above a machining device and the first part being stationary during the machining process. The table (2) also comprises a second face (22) for holding steady a second part (221) to be machined.
