Abstract (en)

[origin: WO2008043778A1] The invention relates to a method for implementing a building framing particularly intended for individual or collective housing. According to the invention, the method comprises the following steps: - a step for assembling (11) on the ground a portion of said framing defining a carrier structure for a roofing of said building; a first attachment step (12) for attaching, on the ground, a first end of at least one pole (331, 332, 333, 334; 53, 54) with said carrier structure while allowing for an articulation of said pole (331, 332, 333, 334; 53, 54) with said carrier structure in order to form at least one displaceable portion in said framing; a lifting step (13) of said portion of said framing; a second attachment step (14) for attaching to a foundation member (39) of said building a second end of said pole or poles (331, 332, 333, 334; 53, 54).
