Abstract (en)

[origin: WO2008037914A1] Method and server for searching for a centre of interest of a user in a geographical zone. The method of searching for a centre of interest according to the invention comprises a step (E16) of interrogating a source (32) of data describing centres of interest associated with geographical location data, with a view to obtaining the number of centres of interest defined by an initial category and a geographical search zone. The method according to the invention comprises:- a step (E22) of splitting said geographical search zone into contiguous geographical subzones; - a step (E24) of obtaining the number of centres of interest contained in each of said geographical subzones; and - a step (E26) of despatching said numbers thus obtained for said geographical subzones to said user.
