Abstract (en)

[origin: EP2077081A1] The furniture has a shell (10) with a lower surface forming a support surface (11), and an interior part forming a cavity (12) opened towards top for receiving a deformable element (50). The deformable element is removably fixed in the cavity of the shell, and forms a deformable receiving surface (51). The deformable element is composed of a slip cover (52) receiving balls e.g. alveolar balls, where the cover has a shape complementary to a shape of the cavity for integrating a surface (53) of the cover in the shell. The shell and the balls are made of expanded polystyrene/polypropylene.
