Abstract (en)

[origin: EP2077362A2] The present invention relates to a tank comprising a plurality of prefabricated concrete elements (2) positioned side-by-side forming an essentially cylindrical tank (1) having a plurality of vertical joints (5) in the form of toggle articulations between the aforementioned plurality of prefabricated concrete elements (2). The tank (1) further comprises an elongated elastic profile (7) positioned in at least one of the aforementioned plurality of vertical joints in the form of toggle articulations, whereby a cross section of the aforementioned elastic profile (7) comprises a central part and two outer parts (9), the aforementioned central part (8) being homogeneous and the aforementioned two outer parts (9) being inhomogeneous.
