Abstract (en)
A power cable assembly includes a power cable, a first connector and a RF cable. The power cable comprises a core portion, an insulating layer covering the core portion, and a covering layer covering the insulating layer. The first connector is provided at one end of the power cable. One end of the RF cable is connected to the power cable. The RF cable comprises a signal line and a covering layer covering the signal line. Via the above arrangement, the power cable assembly is connected to the RF cable that can be used with an electronic device, so that the electronic device can receive FM signals via the RF cable.
