Abstract (en)

[origin: WO2008046958A1] The invention relates to a front lifting device for a tractor, which includes: a frame component (12), from which the front lifting device (10) is arranged to be attached to the chassis (32) of the tractor (28), implement (30) attachment means (26). In addition, the front lifting device (10) includes a rotating frame (24), which is attached to the frame component (12) by a vertical shaft (22), and the means for attaching the implement (30) are attached to the rotating frame (24). The invention also relates to a corresponding method for operating the front lifting device of a tractor.
