Abstract (en)
[origin: WO2008029007A1] The invention relates to a display stand (1) for supporting articles suspended from rods, such as textile articles, comprising a base (3), at least two vertical uprights (5, 7) connected to the base (3), and at least one base structure (9, 46, 77), this last being assembled between the two vertical uprights (5, 7); on which said rods are mounted at right angles, said invention being noteworthy in that the base structure (9, 46, 77) comprises a rigid body (17) provided with horizontal fixed load bars (19) distributed at different heights divided by a regular pitch "p", removable load bars (45), and means (47, 53, 55) for assembling said removable load bars (45) on said rigid body (17), said assembly means (47, 53, 55) being designed to insert a removable bar (45) horizontally between two consecutive fixed bars (19), over at least part of the height of the display stand (1), and thus form within said height a base structure (46) of load bars having two successive pitches " p_{1} " and " p_{2} ", the sum of which is equal to the pitch "p".
