Abstract (en)

[origin: WO2008007260A2] A system comprises a communication terminal (CT1) which has a near field communication unit (10) for near field communication with a mobile device (MD1) when in range of the near field communication unit (10). An output device (OD1; OD2) is positioned outside the range of the near field communication unit (10) to provide output to a user of the mobile device (MD1). A controller (11) controls the output device (OD1; OD2) to provide the output dependent on an orientation (D1) of the mobile device (MD1).
