Abstract (en)
[origin: WO2008043719A1] The invention relates to an electronic key, particularly for a closing apparatus (105) for a motor vehicle (100), having a housing (20) made of plastic and an electronics unit (40) for data communication with the closing apparatus (105), a holder (30) formed on the housing (20), and a cover (50) which is mounted detachably on the housing (20) and seals the holder (30). The invention provides for a container element (60) to be able to be inserted into the holder (30), where the container element (60) holds the electronics unit (40) and an energy store (41), the container element (60) has a collar element (61) and the underside of the cover (50) rests against the collar element (61).
