Abstract (en)

[origin: EP2080732A1] The vehicle (12) has a carrier (16) provided with a fork arm (17) and rotatably supported at a frame around an axis running horizontal and parallel to the fork arm. Another carrier (18) is provided above the carrier (16). The carrier (18) comprises a receiving device i.e. fork arm (19), for detecting a cover of a container, and is vertically height adjustable and/or pivotable upwards and downwards against the frame. The frame comprises upper and lower frame parts (15a, 15b), and the receiving device comprises an electro magnet at a lower side. An independent claim is also included for a combination of an unloading vehicle with a container cover.
