Abstract (en)

A traveling control device comprises an obstacle detecting portion 1a to detect an obstacle in front of a vehicle, a dangerous-area setting portion 1d to set a contact-dangerous area with a specified width which is located beside the obstacle which is detected by the obstacle detecting portion 1a, an entry detecting portion 1f to detect an entry of the vehicle into the contact-dangerous area, and a warning control portion 1h to operate a warning device 21 when the entry of the vehicle into the contact-dangerous area is detected by the entry detecting portion 1f. Accordingly, it can be surely prevented that the vehicle approaches the obstacle too close or contacts the obstacle, thereby improving the safety of the vehicle traveling.
