Abstract (en)

[origin: EP2081236A2] An assembly (30) is provided and includes at least one solar cell (10) comprising a photovoltaic element (12) having an upper surface (14) for receiving and absorbing radiation, a lower surface (16) for coupling to an article (20), a first end (18) and a second end (22). The solar cell further includes at least one magnet (24) attached to the first end of the photovoltaic element. The assembly further includes an article (20) comprising a substrate (32), and a magnetic film (34) disposed on the substrate and defining at least one receptor site (36). Each solar cell is disposed at a respective receptor site.
