Abstract (en)
[origin: US2010306973A1] The invention relates to a plug-in lock for the detachable connection of two belt ends for a climbing harness having a lock part and an insertion part, wherein the lock part has an end on the insertion side for inserting the insertion part, and an end on the belt side for fastening a belt, wherein the insertion part has a snap-in pin, which engages into a first latch mechanism in the lock part upon inserting the insertion part into the lock part such that the insertion part is secured against being pulled out of the lock part (in the direction opposite of the insertion direction in the lock part. The first latch mechanism is configured manually non-detachable, and a second manually detachable latch mechanism is arranged and configured such that the insertion part can be detached from the lock part by sliding out the same in the insertion direction.
