Abstract (en)

[origin: WO2008052346A1] A device for stimulating acupuncture points on the face of a human subject thereby providing a face lifting to the subject is disclosed. The device comprises a mask and optional bands. The mask is mounted to the face of a human subject, and customized in accordance therewith. The mask defines an outer side and an inner side for being interfaced with the face. Magnets are positioned on the inner side of the mask so as to be superimposed on predetermined acupuncture points for stimulation thereof. The bands are mounted to the limbs of the human subject. The bands include magnets for stimulating predetermined acupuncture points on the limbs. When the mask is mounted to the face and the bands are mounted to the limbs of the human subject, they stimulate their respective target acupuncture points and provide for an electromagnetic energy circuit within the body of the given human subject. A method of making the mask is also provided. A method of for an acupuncture face lifting of a human subject is also disclosed.
