Abstract (en)

[origin: FR2907947A1] The process for authenticating and/or identifying a safety/value document including a voucher and a ticket such as entrance ticket and transport or event ticket, comprises mechanically altering a sheet material to deliver apparent portion of a structure (5) with intersecting thread, closing the document to observe the apparent portion of the structure, manually altering the document to deliver the apparent portion of the structure on its length portion by peeling, and altering the structure during the peeling of the document. The process for authenticating and/or identifying a safety/value document including a voucher and a ticket such as entrance ticket and transport or event ticket, comprises mechanically altering a sheet material to deliver apparent portion of a structure (5) with intersecting thread, closing the document to observe the apparent portion of the structure, manually altering the document to deliver the apparent portion of the structure on its length portion by peeling, altering the structure during the peeling of the document, altering the document in a zone containing the portion of the structure by perforating, and closing the document to observe the apparent portion of the structure in the perforated zone. The document contains sheet material with a substrate (4) and structure with intersecting thread, which is partially drowned in the substrate. Independent claims are included for: (1) a sheet material; and (2) a safety and/or value document.
