Abstract (en)
[origin: EP2082941A2] The electric suspended conveyor (10) has a rail system (12) running above a ground level. An electric suspended conveyor carriage (14) travels on the rail system. The electric suspended conveyor carriage has a chassis (22), and is driven by a motor (26). A carrier roller (24) is provided, which rolls on an upper side of the rail system. The chassis has two counter-pressure rollers (36a,36b), from which one of the counter-pressure rollers rolls in advance in travel direction of the chassis of the carrier roller and one of the carrier rollers rolls lagging on a lower side of the rail system.
