Abstract (en)
The lock has a cylinder housing (1) with a cylinder wall (2), and a cylindrical core recess (3) in which a rotatably fitted cylindrical core (6) having an axial key channel (9) is provided around its central longitudinal axis. A plate tumbler (13) is provided on a side of a central longitudinal level (25) that lies perpendicular to longitudinal bars (16, 17) of a frame. Steering levels (24) provided at a distance from the level (25) protrude in the interior of the frame. The steering levels have the tumbler at a distance from the level (25), and are provided on both sides of the channel. An independent claim is also included for a flat key that is formed as a reversible key for a cylinder lock.

Abstract (de)
Die Erfindung betrifft ein Zylinderschloss mit Plättchenzuhaltungen und einen Schlüssel für das Schloss, das insbesondere als Kraftfahrzeugtürschloss verwendbar ist.
