Abstract (en)
[origin: EP2083233A2] The built-in cooling device has a cuboid-shaped body (1) enclosing a heat insulated inner space (3). An apron assembly (4) is arranged under a base area of the body. A compressor (6) is carried partly in the apron assembly and partly in a base side recess (5) of the body. The recess is adjacent to the reverse side of the body. The apron assembly has an inlet and an outlet on a front side for cool air.
