Abstract (en)

The invention relates to a plug-in connector. Plug-in connectors of this type are used, for example, for attaching cables to devices in electrical appliances, machines, motors, vehicles or the like. As a plug-in connector which can be used for different plug-in contacts and simplifies the connection process and the attachment of a cable to a device, the invention provides the plug-in connector according to claim 1 including a plug housing pair with two connectable plug housings and a contact housing pair with two connectable contact housings, each plug housing comprising at least one socket for a contact housing.
