Abstract (en)

[origin: WO2008061539A1] A method for communicating navigational instructions to a user. The user wears/touches skin electrodes that are operatively coupled to a navigational device. A navigational device generates signals for activating the skin electrodes based on direction indications generated by the navigation device. An apparatus including a navigational device and at least two skin electrodes. The navigational device generates activation signals for the skin electrode based on navigational instructions generated by the navigational device.
