Abstract (en)
[origin: EP2084984A2] The case (10) has a longitudinal side wall or inner side designed as a horizontal or vertical swivelable closure wall or as an attachable closure wall, where the case is designed in a cabinet type and is divided into multiple compartments by multiple intermediate bases (16) that are arranged at a distance to each other. A container (17) with a cover is provided in the compartments for holding of treatment instruments and cosmetic treating units, where an outer wall of the case is made of polycarbonate.
