Abstract (en)

[origin: EP2084994A1] The present invention relates to a mattress (1) comprising two lying surfaces and at least one layer (6,7) extending between said lying surfaces, at least substantially parallel thereto, which consists of a network of hollow spaces comprising a plurality of through holes (8) extending through said at least one layer (6,7), at least substantially perpendicular thereto, in which springs (9) are accommodated, wherein said at least one layer (6,7) comprises a network of hollow spaces with relatively large cavities in an average cavity density of less than 500 cavities per cm³.
