Abstract (en)
A laundry treatment method comprises a step performing spinning process by using a washing machine (1), and a step performing drying process. The washing machine comprises a tub (2), a drum (3), and a blower (4). The drum comprises plurality of through holes (10) formed in walls (9) thereof. A supplemental process is implemented between the spinning process and the drying process. The supplemental process comprises a step that activates the blower to blow airflow into the tub and subsequently into the drum through the through holes. An electrical appliance for treating laundry comprises a control device which is programmed to be operable to implement the supplemental process.
