Abstract (en)

A window stay having an adjustable friction setting comprises a guide (100) arranged to be secured to a window frame and a friction slider (400) arranged to move freely inside the guide. The friction slider further comprises friction generating means and adjustable control means. The adjustable control means further comprises a friction setting means (704) and a friction adjusting means (700) and controls the amount of friction generated by the friction generating means, thereby controlling the freedom of movement of the friction slider within the guide.
